Family Child Care Home Education Network

Funded by the California Department of Education

Scrap Book

changing tides
family services

This scrap book shows a sample of seasonal activities completed by children enrolled in the Family Child Care Home Education Network (FCCHEN).

changing tides

family services

- This program has enhanced services, such as:
- early education activities,
 - free nutritious meals and snacks, and
 - biannual developmental assessments of children in care.

Child care is provided by licensed providers in their own homes, providing a family atmosphere.

We hope you enjoy these slides.

Those incredible, troublesome tiles

LIKE AN UNFINISHED puzzle, the underside of "Columbia" (right). Without them, the orbiter would burn up on reentering the earth's atmosphere. Approximately 34,000 tiles cover about 20 percent of the orbiter's surface.

At a Lockheed Missiles and Space Company facility in Sunnyvale, California, a technician (left) surgically concentrates on the task of applying the tiles before a ceramic coating is applied. The coating enables the tiles to withstand temperatures up to 2,500°F.

What about all those unpredictable weather extremes?
